

Job Description - Senior PHP Developer

Papertrail is growing our development team! We are hiring a Senior PHP Developer to help deliver on key development tasks over the next 6 months and beyond. This role is a balance of individual work and working with a highly collaborative team. You will be working directly with the Head of Platform to assist in the important work of delivering projects inline with our product roadmap for our growing customer base and internal tool requirements.

We're a software company that helps safety conscious businesses and equipment owners around the world to reduce their paperwork and stay compliant. We're a team united by our shared values of working hard, being accountable and working together as a team.

Papertrail is based in the UK, with offices in North Wales and Newcastle and has a team of 12. Our customers and partners include global manufacturers of safety equipment, renewable energy companies and adventure parks around the world, with customers on every continent.

This role at Papertrail will amplify your career. You will have ownership and support to make a big difference and have an impact on the future growth of the development team.

If you're a person who is driven by delivering outstanding work and results, then this role is made for you.

You're good at:

- Designing and building PHP Code within an API environment
- Development languages PHP (Laravel), Mongo, SQL, Redis
- Competent, confident and efficient in your development ability and skills
- Communicating with fellow team members

Extra awesome:

- Collaborating with others to help develop and drive best practices
- Using development tools such as GitHub and Pivotal Tracker
- Strong understanding of SaaS applications and platform development
- You have a never say never attitude

What you'll do

As a Senior PHP Developer, you'll be responsible for:

- Designing and implementing PHP Code
- Managing customer data
- Managing our databases
- Investigating and resolving bugs within the applications
- Ensuring the API supports, fully, the needs and demands of our Mobile and Web Applications
- Maintaining, supporting and building of internal tools

The following experience is relevant to us:

- At least 2 years experience within a development role
- Development languages PHP (Laravel), Mongo, SQL, Redis
- Working in an agile environment
- Understand and working through a large code base
- Excellent communication skills, a great listener.
- Experience of working in a SaaS Company

Why join us

Working at Papertrail can accelerate your career and give you the opportunity to work with world-class talent. We're a team that loves what we do and we thrive on our ability to make an impact. There are many benefits that come with working with us; such as:

- Flexible and remote working
- All the tools you need to execute your job well
- Future career opportunities as the business grows
- See your initiatives and strategies deliver results

Holiday entitlement starts at 23 days per year increasing with time in post. Office hours are 9-5 nominally. You will be contracted to work 35 hours per week. Flexible and remote working by agreement. Part time and/or job share will be considered.

Apply today by emailing us your CV and covering letter...

The application deadline is 23rd April, and we will be inviting people for interview on the 29th/30th of April.

Please send your CV and covering letter to mail@papertrail.io
